

LC Laboratory Scientist – Biomolecules Analysis

SCOPE

To face our constant growth, we are currently actively looking for a **LC Laboratory Scientist – Biomolecules Analysis**

You will work on **innovative biopharmaceutical products** under development (preclinical and clinical phases).

You will be part of a team involved in projects outsourced by our clients

Those projects are related to the development, validation and/or application of analytical methods based on a protocol for the characterisation and quality control of (bio)molecules.

YOUR MISSION

You will report to the Technical Leader

You will be part of a team of 5 people

In this role, you will be accountable for

- Performing daily laboratory activities related to method development, validation and transfer depending on the client project
 - Performing analyses
 - Processing data
 - Writing reports and associated supporting documents
 - Presenting/discussing results
- Applying methods for QC and stability studies

Depending of your level of experience and autonomy, you could also be accountable for activities such as

- Validation of raw data
- Training team members and others on technical skills
- Taking part in the writing/preparation of protocols
- Supporting audits and investigations

PROFILE

Master 's degree or PhD in Chemistry / Biochemistry

Required

- Relevant experience in development, validation and/or application of analytical methods to **large molecules**
- Relevant working experience with **(U)HPLC** coupled to all types of detector (UV, DAD, fluorescence, RI, CAD), **liquid chromatography applied to biomolecules (SEC, IEX, etc)**
- Good knowledge of **capillary electrophoresis on macromolecules (ICIEF)**
- Fluency in French and a good command of English (spoken and written)

Pluses

- Relevant working experience in the pharmaceutical industry in a **GMP** environment
-

Work @ Quality Assistance s.a.
